FAMUSecure Configuration Instructions for Mac Computer

FAMU Secure is a new wireless network that operates on the FAMU newly installed 10 GBb network backbone providing increased speed and reliability for network users. FAMU Secure uses WPA2-Enterprise that is considered the gold standard for wireless network security, delivering over-the-air encryption and a high level of security. FAMU Secure also utilizes SecureW2, a Wireless Security Device Management System to helps solve the common pains of deploying and managing our WPA2-Enterprise, making life as easy as possible for your users and our IT staff.

How to Connect to FAMUSecure Wireless Network on Mac Computer

1. Click on the wireless icon at the top of the screen to open the Wireless Network Connection Screen. Select "FAMUGuest" and click Connect.

2. Open Safari, Internet Explorer, FireFox, Google Chrome, etc browser

3. iRattler account users will enter their username and password, and select "Sign On"

W	elcome to the Florida A&M University Guest Portal.
Visitors will need to	o create a Guest account by clicking "Don't have a Guest account" below to obtain access.
Visitors	from eduroam connected Universities should access the eduroam wifi network.
FAMU Students, Fa joe1.rattler@famu Sign On	aculty and Staff please sign on to the FAMUSecure wifi network using your FAMNETId (e.g. u.edu). You can access our auto configuration tool (Xpressconnect) at <u>connect.famu.edu</u> .

Success You now have Internet access through this network.	
	Contact Support

Note: Some users may need to exit and re-enter there web browser to gain internet access. Restarting your computer maybe necessary to establish and internet connection.

- 7. Open a "Web Browser" (Safari, Internet Explorer, FireFox, Google Chrome, etc.) Click on the below link to start XpressConnect. Or copy and paste into a web browser the following: <u>http://connect.famu.edu/</u>
- 8. Click "I Accept of the terms of the End-User License Agreement" then click "Start"

FAMU Welcome To The Florida A&M University Network
This wizard will configure your computer for secure network access.
To ensure your security, the Roida A&M University network utilizes a secure authentication mechanism known as WPA2-Enterprise and 802.1X. This security mechanism protects your user name and password. In a wireless environment, it also protects your data with network encryption. To utilize this secure network, your network connection requires specific settings. This wizard will ensure that your machine is properly configured. XpressConnect will attempt to load automatically using a Java Applet or ActiveX. If you prefer, you may <u>load XpressConnect menually</u> .
To get started, simply accept the End-User License Agreement and click 'Start >'.
I accept the terms of the <u>End-User License Agreement</u> . Start >

9. Click "This Device"
